Re: **Submittal of MICROPAS7 Software for 2003 IECC Approval**

Dear **Michael**:

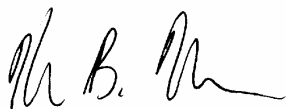

The purpose of this letter is to inform Southern Nevada Building Officials that MICROPAS7 v7.0 IECC Version was forwarded on June 30, 2005 to Eric Makela of Britt/Makela for review and approval. This software is a Nevada specific version that has been carefully modified to follow the requirements of the 2003 IECC with the Southern Nevada amendments.

I have been working with Mr. Makela to resolve a few minor issues and believe that the software is now ready for use. My understanding is that Britt/Makela is under contract with the Governor's office, and therefore meets one of the criteria adopted by SNBO for review and approval.

I am eager to release this software in advance of the August implementation date. However, I would prefer to not release the software until I have an approval letter from SNBO. Knowing that time is short, and that it may take some time for an approval letter to be released, I request that SNBO issue a letter confirming the temporary approval of the software pending the review process.

Please call me if there if any additional information is required. Thanks for your attention to this matter.

Sincerely,

**Ken Nittler, P.E.**
